Identify the mnemonic used to remember PEMDAS.

Answer key: C

With PEMDAS you can simplify expressions: you simply have to follow the rules.

First evaluate **P**arentheses, then **E**xponents, followed by **M**ultiplication and **D**ivision and finally you evaluate **A**ddition and **S**ubtraction.

Remember to always evaluate **M**ultiplication and **D**ivision as well as **A**ddition and **S**ubtraction from left to right!

You can remember this order with a funny mnemonic:

Please **E**xcuse **M**y **D**ear **A**unt **S**ally.
