How many berries do they have?

Place the correct numbers into the number sentence.

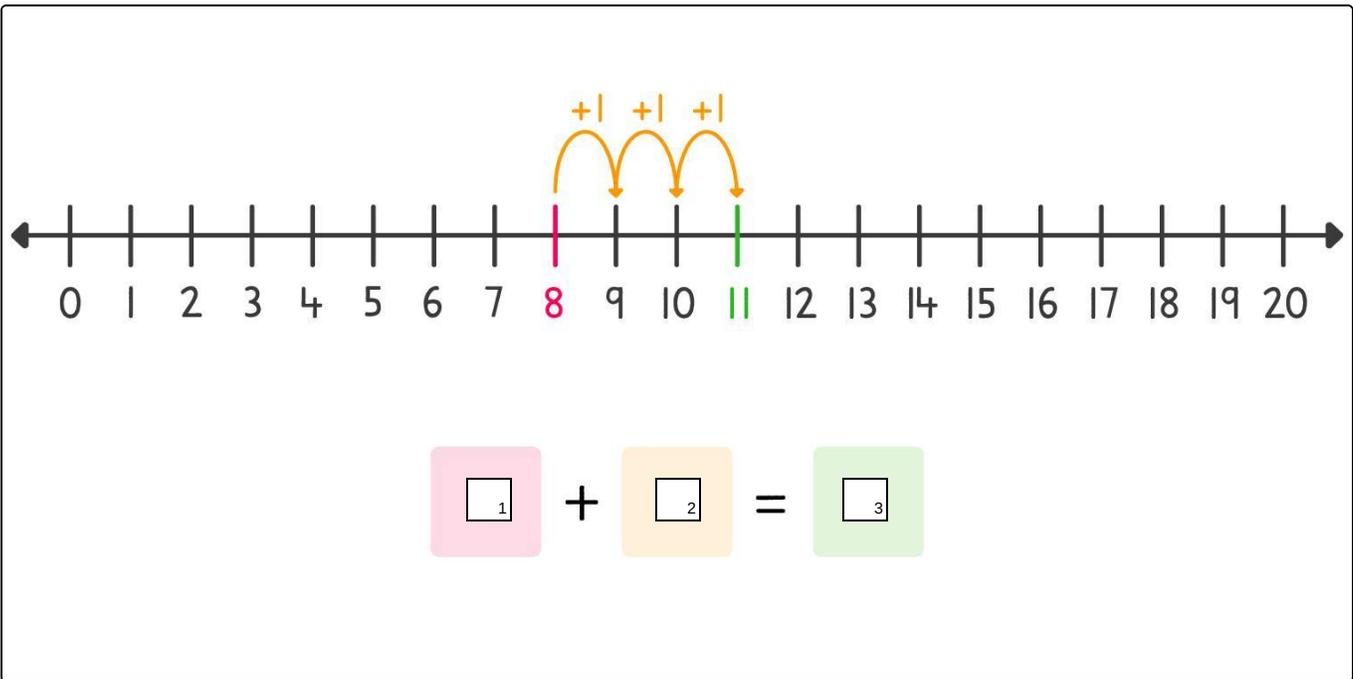

Mr. Squeaks has **eight** blueberries and Imani has brought **three** raspberries.
How many berries do they have altogether?

Use the number line to help you to select the correct numbers.

Start with the largest number.

- 11 4 5 3 8

Our hints for the tasks

1
from 5

How many berries do they have?

1. Hint

How many blueberries did Mr. Squeaks have? This is your starting number. We are starting with this number because it is the *biggest* number.

2. Hint

How many raspberries did Imani bring? This is the number you are adding on.

3. Hint

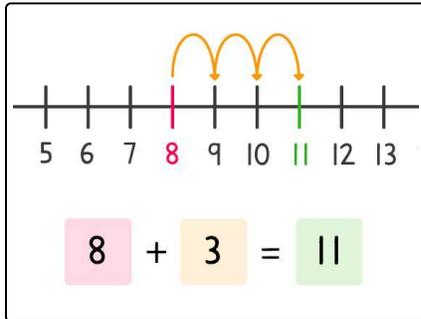

Use the jumps on the number line to help you find the total number of berries.

Solutions and solution approaches for the tasks

How many berries do they have?

Answer key: 1: 8 // 2: 3 // 3: 11

They have **eleven** berries altogether.

- Mr. Squeaks had **8** blueberries.
- Imani brought **3** raspberries.
- Using a number line to help us, we start at **8** and count on **3** more.
- We end on **11**, so that is our answer.
- This problem could also be solved by starting at **3** and counting **8** jumps forwards.
- We would still land on **11** if we did it this way.
