How much data is left?

Solve the expanded subtraction problem to find out how much data is left.

Mr. Squeaks and Imani just got a text message from their friend Newton the Bee. Using the problem written in expanded form here, can you help Newton figure out how much data is left?

☐

222 megabytes

A

☐

425 megabytes

B

☐

233 megabytes

C

☐

203 megabytes

D

Our hints for the tasks

How much data is left?

1. Hint

In this problem you don't have to regroup any numbers, just subtract the numbers provided.

2. Hint

Remember to start from the ones column and move to the tens place then the hundreds place.

Solutions and solution approaches for the tasks

How much data is left?

Answer key: C

Newton has **233 megabytes** of data left. Since this problem didn't require any regrouping, you could just subtract each of the expanded numbers individually!

In the ones place, five minus two is three. In the tens place, 50 minus 20 is 30. Lastly, in the hundreds place, 400 minus 200 is 200. Then recombine the digits to get the answer!
