How many trees did Mr. Squeaks and Imani see?

1. Hint

How many ones are there altogether?

2. Hint

How many tens are there altogether?

3. Hint

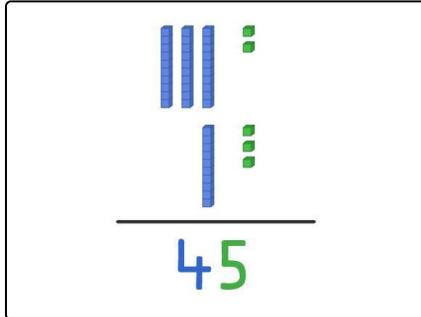

There are four tens or 40 and then five ones so what is $40 + 5$?

Solutions and solution approaches for the tasks

1
from 6

How many trees did Mr. Squeaks and Imani see?

Answer key: A

Mr. Squeaks and Imani saw **45** trees.

- If we add three tens from 32 and one ten from 13 we get four tens or **40**.
- We then add two ones from 32 and three ones from 13 to make five ones or **5**.
- $40 + 5 = \mathbf{45}$.
